

# Barber on the Road!

Barber Vintage Motorsports Museum is proud to announce *Barber on the Road!* These portable museum programs can be brought to your location or instructed virtually. Enjoy a unique Barber experience without having to travel!

We offer a variety of motorsports-themed STEM topics that coincide with Alabama State Educational Standards.

## **Barber on the Road Programs:**

**Newton's Laws of Drag Racing** (3rd Grade, Science) Students explore how force, motion, design, and weather all impact the sport of drag racing. By designing and testing their own drag bike, students will see these principles come to life.

**Fuel Steam Ahead** (4th and 5th Grade, Science) Students learn about the future of racing by exploring the many sustainable solutions available in racing today and by participating in our "Battery-Up Activity."

**Motorcycle Engineers** (Kindergarten, Science and Math) Students explore and conduct experiments to learn how science, math, and simple machines create exciting motorsports moments.

**Tool Talk** (Ages 3-6, Engineering) Students learn how tools and simple machines are used in motorsports by participating in story time and by practicing with real tools on our motorcycle models.

**For more information please contact Rachel Landers at 205-702-8729 or [rlanders@barbermuseum.org](mailto:rlanders@barbermuseum.org).**

The Barber Vintage Motorsports Museum is a 501 (c) 3 Tax Exempt Private Operating Foundation
